Education

National Institute of Technology Jalandhar Nov 2022 – Jun 2026
B.Tech. in Computer Science and Engineering

Shiv Jyoti Convent School Apr 2019 – Mar 2021
Class XII (CBSE)

Hermann Gmeiner School, Varanasi Apr 2017 – Mar 2019
Class X (CBSE)

Experience

CloudFinOps – Cloud Cost Optimization Startup Jan 2026 – Jul 2026
Data Analyst Intern

- Worked with AWS cost and usage data using SQL and Python to understand spending patterns and identify unusual changes in cloud costs.
- Created Power BI dashboards to help track cloud spending, resource usage, and monthly cost trends.
- Cleaned and organized datasets using Pandas and PostgreSQL before using them for reporting and analysis.
- Studied cost patterns and highlighted areas where cloud resources could be managed more efficiently.

Projects

E-commerce Revenue & Customer Analytics *Python, SQL, Pandas, SQLite, QuickSight*

- Built an e-commerce analytics project using data from more than **18K orders and 2.5K customers**.
- Used SQL and Python to study **revenue, average order value, profit margin, customer acquisition, funnel conversion, and churn**.
- Grouped customers using **RFM segmentation** and used cohort analysis to understand repeat purchases and customer retention.
- Found areas such as low-margin products, funnel drop-offs, and inefficient acquisition channels that could affect revenue and growth.

Customer Churn & Retention Analytics *Python, SQL, Pandas, AWS S3, Athena, QuickSight*

- Analyzed data for more than **11.8K customers and 107K customer-month records** to understand customer churn and retention.
- Studied metrics such as **churn rate, retention, MRR, ARPU, CLV, customer engagement, and cohort performance**.
- Created a simple **0–100 churn-risk score** to separate customers into different risk groups and identify valuable customers who may leave.
- Used **Logistic Regression** as a churn prediction model and prepared the data flow for analysis using Amazon S3, Athena, and QuickSight.

Technical Skills

Data Analysis: Python, Pandas, NumPy, SQL, Excel, Exploratory Data Analysis
Visualization: Power BI, Amazon QuickSight, Matplotlib
Databases: PostgreSQL, MySQL, SQLite, MongoDB
Analytics & ML: Statistical Analysis, Cohort Analysis, RFM Segmentation, Logistic Regression, Churn Analysis
Cloud & Tools: AWS S3, Athena, EC2, Git, GitHub, Jupyter Notebook, Linux
Programming: Python, SQL, C++, Java, JavaScript
